has successfully completed the online Specialization

Microsoft Excel: Learn with Projects

Earners of this certificate demonstrated foundational to intermediate competency in Microsoft Excel through project-based learning. They completed 12 guided projects covering spreadsheet creation and navigation, basic and advanced formulas and functions including SUM, SUMIF, IF, VLOOKUP, XLOOKUP, and INDEX MATCH, data sorting, filtering, and analysis, PivotTable construction, chart creation, conditional formatting, dashboard assembly, project management tracking, and AI-assisted data workflows using ChatGPT. Learners built functional Excel artifacts across every project, demonstrating the practical spreadsheet skills required for entry-level business and data roles.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
